

Prix sensors.ch 2027

CHF 1'000

for the best Bachelor's thesis in the field of sensor technology and sensor systems

With the Prix sensors.ch 2027, the sensors.ch association recognises an outstanding Bachelor's thesis in the field of sensor technology and sensor systems. The award honours innovative work of high scientific quality, practical relevance and a convincing presentation of the results.

Who can take part?

Students at Swiss universities of applied sciences who obtained their Bachelor's degree in 2026 are eligible to participate.

Which theses are eligible?

Bachelor's theses may be submitted on the design, manufacture or application of physical, chemical or biological sensors.

How are submissions assessed?

The key criteria are the originality of the topic, a clear objective, the creativity of the proposed solution, practical relevance and the quality of the presentation of the results.

What must be submitted?

An overview poster and the complete Bachelor's thesis must be submitted as PDF files by e-mail before the deadline.

Award committee

The award committee is composed of representatives from the Swiss sensor industry and applied research.

Submission deadline
30 September 2026

Please send the overview poster and the Bachelor's thesis as PDF files to:
